

## Virtual Server Request

The following information will be used to construct the Virtual Server that will Be used for the specific application or service.

The following information will form a detailed Virtual Server (VM) request between the UNC System Office and the campus in which the UNC System Office will commit to implementing the approved server. The actual building of the server can not start until this document is completely filled out and returned to the UNC System Office.

Requested By:

Request Date:

Request is for Campus:

Desired Hostname:

Check the type of operating system:
